Generation-unique direct reads: 36 client-attempt overlaps, 10 accepted and 26 safely rejected
A | Timestamped write/read intervals
Read attempt, run 1
Elapsed monotonic time (ms)
PUT attempt (prepare + SDK call)
Accepted generation
Safe rejection
B | Client-attempt overlap
Read attempts
Accepted in overlap
Rejected in overlap
No attempt overlap
21
20
Run 1
Run 2
Client PUT attempts include payload preparation; SDK-call/commit overlap is unproven. Two RXE paths, one VM host.
